

To whom it may concern,

Plaza Motors Corporation (PMC) initiated a project with London Consulting Group on the areas of sales, marketing, logistics and service from November 26, 2007 to August 8, 2008. The objective was to redesign the company's structure and processes to be more efficient and profitable.

The Consulting Team closely collaborated with us and developed lots of useful tools and parameters for the operation improvement in all areas. Especially, their work in sales administration area gave us a substantial contribution in order for us to determine the forecast as well as the record tracking.

The consulting team has been supporting the Company even after the project end, ensuring the continuity of implemented changes and strategic objectives.

For everything mentioned above, I recommend London Consulting Group as a group of professionals fully capable of developing these types of projects, focused on process improvement and efficiency.

Cordially,

Noriaki Yashiro
President & CEO
Plaza Motors Corporation
